

BRENDA RANGEL

DATA ANALYST | APPLIED DATA SCIENCE

Pella, Iowa, United States | rangelorb97@outlook.com | +1 (641) 861-8280 | [LinkedIn](#)

PROFILE

Data Analyst with experience in operational analytics, KPI reporting, process evaluation, and applied data science across finance, manufacturing, and digital product environments. Skilled in Python, SQL, and statistical analysis to transform business and operational data into actionable insights. Experienced in working with stakeholders to define metrics, improve workflows, and support data-informed decision-making through reporting, dashboarding, and analytical modeling.

PROFESSIONAL EXPERIENCE

Data Analyst, Nuxio Solutions

Aug 2022 to Present

- Analyzed government business data and Google Trends using Python to identify geographic demand patterns and support digital advertising strategy.
- Evaluated spreadsheet-based operational data and logistics workflows to uncover inefficiencies, define process improvements, and contribute to an 80% efficiency gain and \$10K+ in annual savings.
- Led operational and requirements analysis across client initiatives, translating stakeholder needs into workflow logic, KPI definitions, and reporting requirements.
- Defined KPI and dashboard requirements for web-based platforms, enabling performance monitoring and more data-informed operational decision-making.
- Partnered with developers, UX/UI, and QA to translate business objectives, workflow challenges, and data needs into scalable analytics and reporting structures.

Data Scientist, Principal Financial Group

Aug 2021 to Aug 2022

- Developed predictive and statistical models to support marketing and retention initiatives, applying advanced analytics to solve business questions and support data-informed decision-making.
- Conducted PCA-based competitor analysis to evaluate similarity patterns between the organization and other Afore providers in Mexico, generating market and strategic insights.
- Translated analytical models from R to Python, streamlining reporting workflows and reducing dashboard update time by 70%.
- Built interactive dashboards to communicate model outputs and insights to business stakeholders and application users.

Data Scientist Project Associate, CEMEX

Aug 2020 to Dec 2020

- Developed indicator system using SAP, SQL, and Tableau for production tracking.
- Created predictive model with Python to enhance quality control in cement production. Advised management on data quality improvements and model implementation strategies.
- Designed systems that improved tracking efficiency.
- Implemented predictive analytics to boost production quality.
- Collaborated with management to enhance data quality processes.

Global Controlling Department Intern, Hugo Boss

Feb 2020 to Jul 2020

- Assisted in retail KPI analysis and reporting, utilising SAP and Excel VBA.
- Developed market and competitor sales analyses for store launch in China. Revamped Weekly Sales Report, decreasing delivery time by 65%.
- Streamlined KPI reporting processes.
- Conducted thorough market analysis for new store openings.
- Enhanced report efficiency, significantly reducing turnaround time.

EDUCATION

EGADE Business School Masters in Finance

Sept 2022 to Apr 2024

- GPA: 3.7
- Data Science concentration.
- Coursework: Data Science, Advanced Analytics, Core Analytical Methods, Quantitative Methods.
- Completed data-driven finance projects using Python, R and SQL for financial modeling and predictive analytics.

ITESM
Business Informatics

Aug 2016 to Jul 2021

- GPA: 4.0 (98/100); Honorable Mention of Excellence (Best Average).
- VicePresident & Treasurer, ACM Mty — led planning and finance for HackMTY, the largest student hackathon in Mexico (award-winning).
- Concentrated in business informatics, software development and data analytics; completed practical projects using Python, SQL and web technologies.
